NEWS BITES:

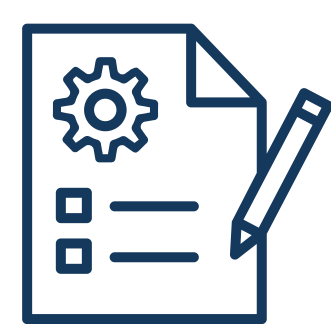

HALF-WAY OVERALL!

We have now reached halfway with BOTH the Prospective and Retrospective Study!

Well done to everyone for reaching this milestone.

SUBSTANTIAL AMENDMENT

The substantial amendment has now been approved.

The study team are localising the updated PISs, consent forms, and patient poster for you. Electronic and paper packs will be sent to each site.

The databases are also being updated. Watch this space for the date the amendment will 'go live'!

PIC Bone Updates from Tim & Dan:

Excellent news for boosting recruitment and getting even more trainees involved:

- The Substantial Amendment has been approved.** NOW recruit all your atraumatic limps and irritable hips into the prospective study.
- We removed the February 2018 barrier for the retrospective study.** This allows you to recruit records from earlier years and push the numbers higher!

Your trainees love audit and research – and this is a simple study that they can get involved in!

We even have clear guidelines on how they can become collaborative authors and be part of the shared glory when PIC Bone publishes.

Keep the good work going PIC Bone fans, we are getting there!

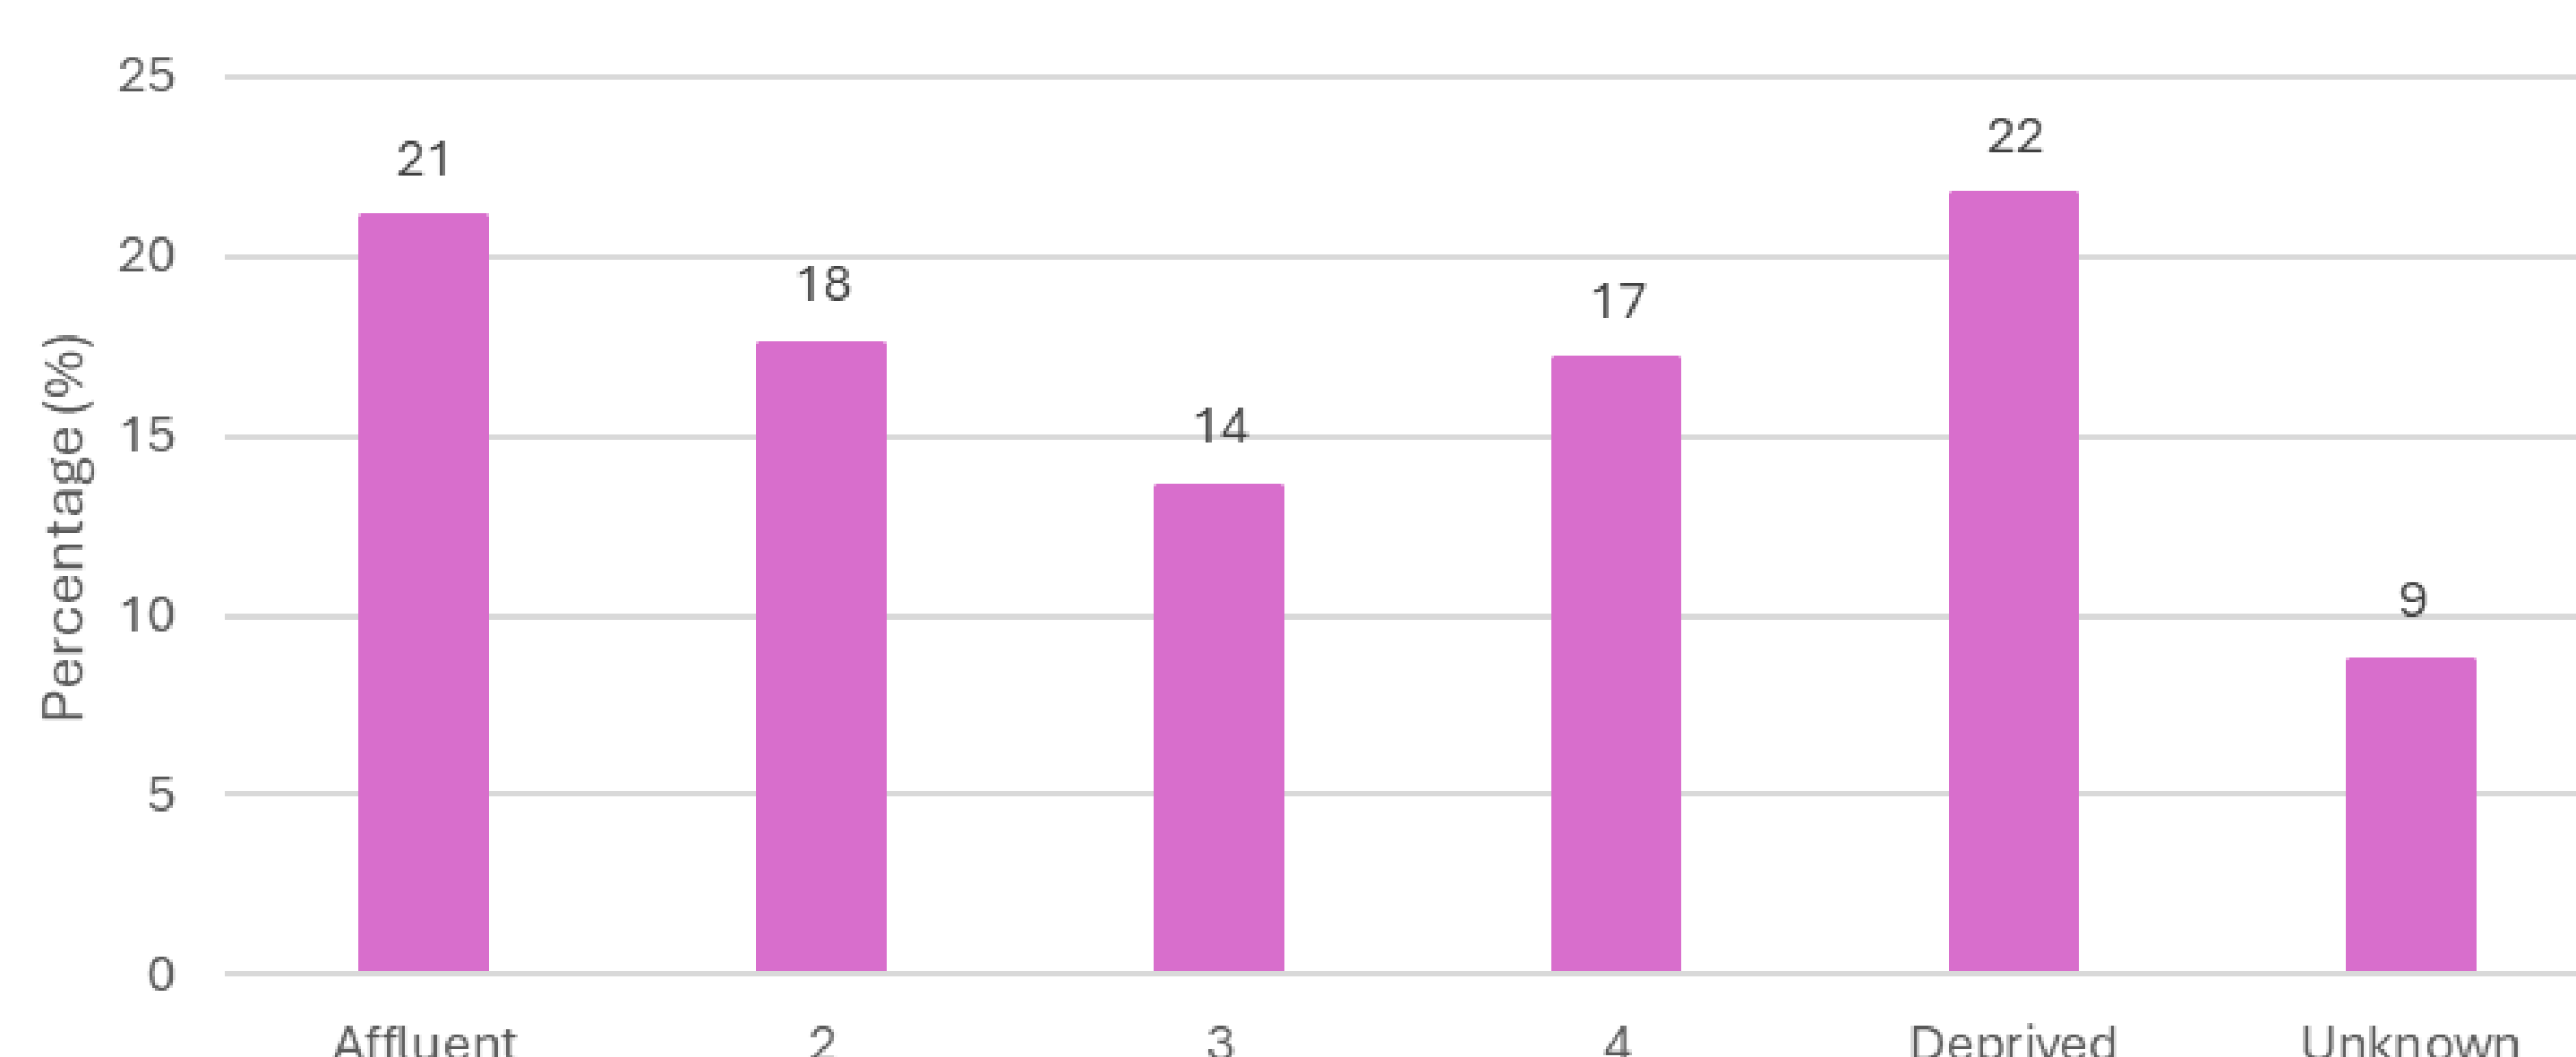

Diversity in PIC Bone

The UK and other European countries want research to be more inclusive. We are delighted that our PIC Bone participants are an incredibly diverse bunch!

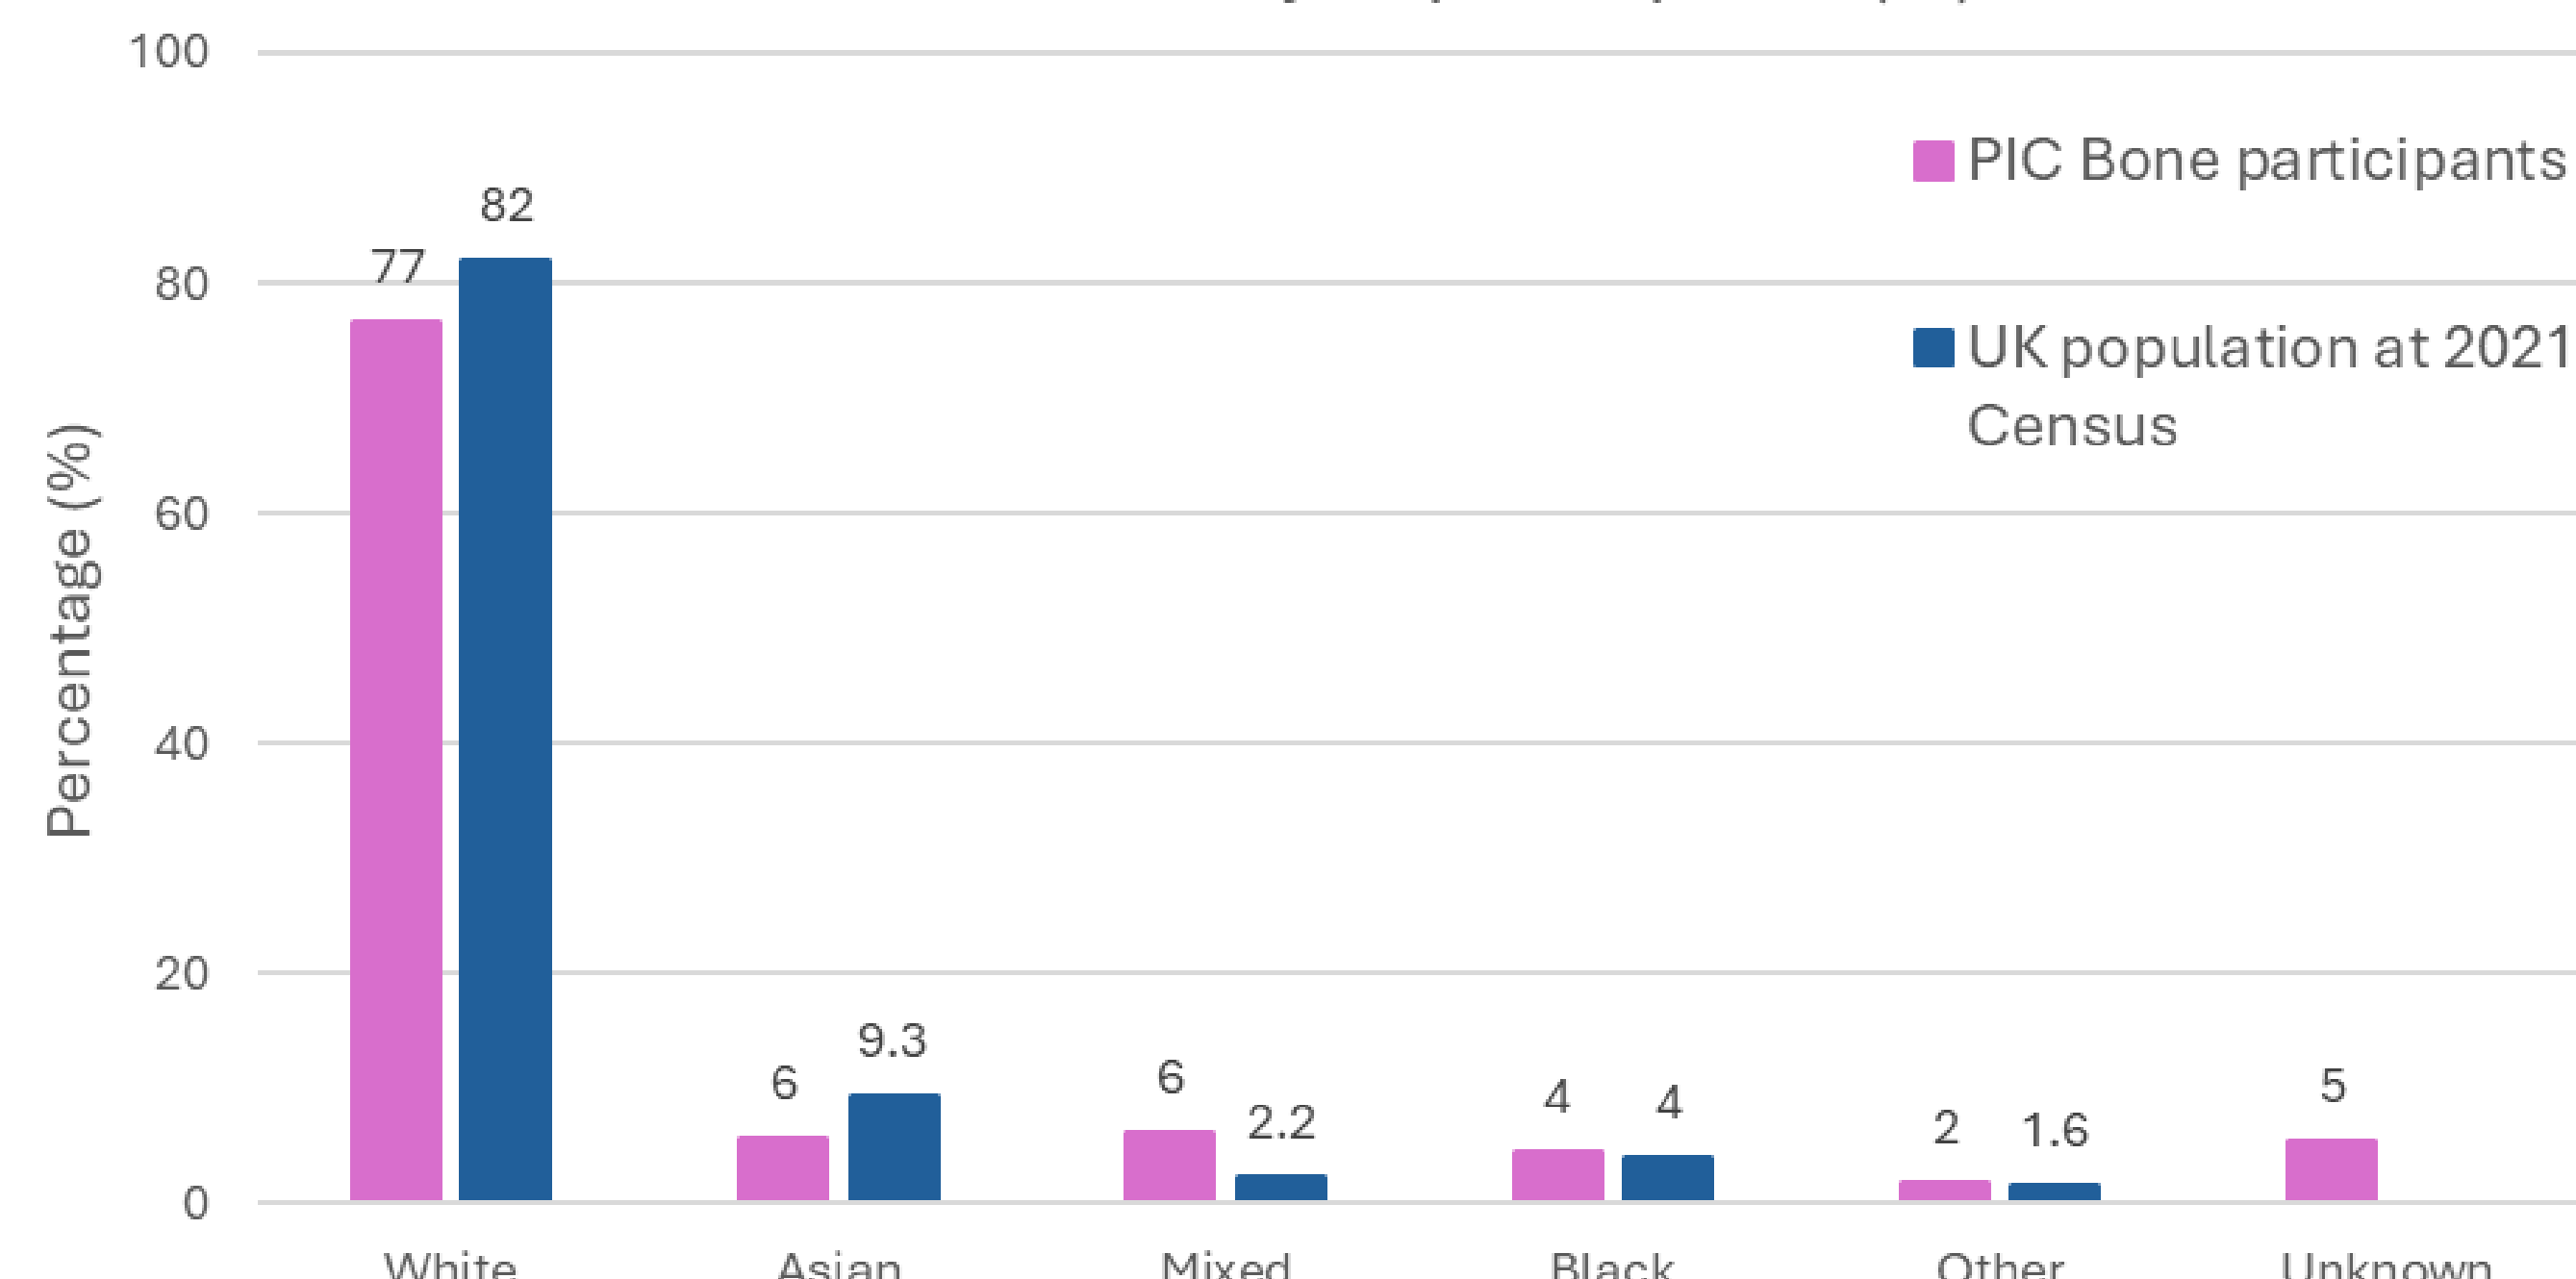

We are very proud that our participants are an accurate representation of the UK population, as our graphs show. The NIHR-INVOLVE project discusses strategies to addressing the need to provide a better service for people under-served by the research community.

Check out this link for more information on NIHR -INVOLVE: www.nihr.ac.uk
